LIQUID-COOLED CAMERA HOUSING

IP66

IP67

DESCRIPTION

The solid construction of this housing makes it suitable for heavy-duty applications, such as the surveillance of ovens, foundries and other high-temperature environments.

The NXW housing, entirely made of polished stainless steel, consists of a body with double chamber for the circulation of coolant or cooling air, closed by two very thick flanges. The rear flange enables cable passage using two cable glands PG13.5. The front flange can be equipped with tempered glass or quartz glass for high temperatures.

MAIN FEATURES

- Made of AISI 316L electropolished stainless steel
- Steel cylindrical chamber for internal circulation of cooling liquid linked to an external circuit
- IP66/IP67
- Supplied air barrier
- 2 PG13.5 cable glands in nickel-plated brass for external connections
- Available accessories: camera power supply, air filtering group for glass cleaning, tempered glass (max. 260°C (500°F)), quartz glass (max. 400°C (752°F)), IR-proof glass (max. 260°C (500°F))
